**To access the Consultations from EPP, go to:**

1. Click Health & Safety from the Menu and choose Launch Consultations.

2. You will then be directed to the Consultations web page where you can select the client and worksite you are bringing the Consultations to.
3. User guides for Consultation Management for the management of pre-starts/toolboxes and other site meetings are available here.

The menu options for Consultations will only appear in the Contractor Portal once your company has one person mobilized to any site using these modules.
